Five steps from a donor's cut to lost coverage, and what users set

1 Aid Money

By donor, channel, service

Data

IHME DAH 1990-2026, 2021-23 average

2 Scenario Cut

Who cuts, how, how fast

3 Gov. Response

What replaces lost aid

You set

Who cuts: A preset scenario, or Custom: the US, 13 other donor groups, or all donors via Global Fund, Gavi, WHO or UNICEF

How the cut flows: Direct and multilateral aid, cut separately per donor

How fast: Sudden, Linear, Front-Loaded, Back-Loaded, S-Curve or Custom

What fills the gap: No Government Replacement, Replace a Set Share, As Much as Fiscal Space Allows or Gradual Budget Increase

Data: KFF MOU Tracker, OECD, IHME 2025 (cuts); IMF WEO, IHME, World Bank WDI (response)

4 Services Lost

Net loss ÷ cost per person

Data

Cost studies per service: GHCC, Value TB, Rosen 2021, White 2011, GiveWell, PMI, Lydon 2014, MSF (2023 US$)

5 Coverage Change

Lost ÷ people in need

Data

UNAIDS, WHO, MAP, WUENIC, UN WPP 2024 births
